

Dear Ladies and Gentlemen,

The safety of Private Data is a major concern for health institutions. The General Data Protection Regulation (GDPR) recognizes data concerning health as a unique and special category of data. Health workers must be equipped with special knowledge about technical, jurisdictional and communicative possibilities. In this framework, our European Erasmus+ Project “**GDPR4Health**” introduces two professional curricula:

European Data Protection under GDPR in Health Care.

Free Online Course for Vocational Training.

This curriculum aims at the skills’ enhancement for Data Protection Officers.

Modules:

1. Legal Aspects – the basis for every DPO
2. It Security – how to ensure the security of IT systems in organizations
3. Soft Skills – how to communicate and implement data protection thinking in organizations
4. Work based Learning (WBL) – Learning from practical examples (online via interactive videos and webinars)

Target group:

- Potential and existing DPOs in Health Care & other sectors,
- IT specialists,
- HR managers,
- legal experts,
- learners

Minimum requirements: Educational qualifications according to EQF Level 5

Duration and start:

Module 1-3: 30 h workload within 3 weeks.

From now on; individually

WBL: 20 h workload within 3 weeks. After finishing module 1-3

Costs:

Free of charge

What European Data Protection under GDPR does mean for Health Professionals.
