

Dr Concetta Di Nora graduated in Medicine at University of Catania in 2012 with laude and specialized in Cardiology at University of Trieste in 2018. She developed clinical competence in echocardiography, advanced heart failure management, heart transplantation and assisted ventricular devices therapy, achieved also in such international training facilities. In Harefield Hospital, London (UK), she spent one year in 2016, investigating the management of patients in intensive care units. In 2022, she passed the Post Graduated Course (PCHF) in Heart Failure in Zurich, being now one of the participants of the PCHF Network around the world.

Currently, she works in the CardioThoracic Department of Udine Hospital. She is actually involved in some international medical associations, such as European Society of Cardiology where she has key roles in some Committees (Exercise physiology in cardiovascular patients; advanced heart failure imaging; diversity, equity and inclusion). Her fields of interest and current investigations include clinical approaches to technological evolution in specific pathologies like cardiac amyloidosis, rare diseases and metabolic pathologies.
